Sr. Manager, Global Product Science & Safety

Description

The role:

The Sr. Manager, Global Product Science & Safety position carries the primary responsibilities of running and mentoring direct reports to grow their capabilities for contributing to the organization, with direct responsibility for science and nutrition input for new product development activities. This position has direct responsibility for products in assigned product categories, including but not limited to Sports and Fitness, Targeted Nutrition and Innovation. The position accountabilities include identifying, documenting and validating the appropriate ingredients, formulations and ingredient characterizations that meet product standards and requirements, including substantiation of health benefits and safety. This position is a hybrid role that includes management and technical responsibilities, using established metrics to track key development & science activities, and will be encouraged to inspire and energize all employees through personal leadership, influence and insightful communication.

→†
